## 1 Introduction

A sample L<sup>A</sup>T<sub>E</sub>X document to demonstrate. Can be used as a template.

### 1.1 Nice wheater all week long

All week we'll have really nice wheater with lots of sunshine and warm temperature for the month. Some thunder may occur in the afternoons. And that concludes the summary of the weather.

#### 1.1.1 Thunder may occur

As we said earlier, some thunder may occur.

And in this new paragraph, well yada yada yada And som bla bla bla.

### 1.2 Blah blah blah

Yada yada yada.

*Blah blah blah?*

## 2 Some mathematics

We can also show of some math in L<sup>A</sup>T<sub>E</sub>X

$2x + 1 = 5$  is  $x = 2$

And some more, like this  $x + x = y$

### 3 Tables

Here I will show a simple table.

| Day       | Min Temp | Max Temp | Summary  |
|-----------|----------|----------|--|
| Monday    | 12C      | 23C      | Sunshine all day long.                             |
| Tuesday   | 15C      | 20C      | Some clouds, other than that nice weahter.         |
| Wednesday | 10C      | 20C      | Some rain and possibly thunder during the evening. |

And thats the weather report for the week. Nice huh? In a table and everything with the top row in gray and all.
